HEADS UP

SURGICAL EXPERIENCE

What Sanma Yoko Exoscope does?

optimally put everyone in operating room under microscopic view

the picture perfect 3D image ensures high productive results for surgeons, assistants & academic learners

Sanma Yoko offers optimal & stunning three dimensional visual experience.

How ?

Thanks to the 3D technology, Sanma engineered this feature for next gen micro-surgical application.

Ensures valuable surgical attention and ability on surgery instead of controlling the traditional conventional operating microscope device.

Thereby consistency concentration on surgical procedures saves patient's dramatical stabilization and satisfactory surgical results

Yoko
EXoscope

optimal

stunning panoramic 3D view ensures fine deep anatomical structure , thus supports escalating series of surgical developments for surgeons, assistants and academic learners.

EXoscope

Surgeon will enjoy the best ever visual effect

Binocular eyepiece tube, is now a conventional feature

Skips the confusions and negotiations on configuring the assistant co-observer tube

Allows everyone in operating room to observe and follow thorough surgery

1. Monitor tilting adjustment
2. 300mm motorized up/down height adjustment
3. 3D glass storage
4. Recording access

1:6 ratio zoom

200 - 500mm variable working distance

6 axis electromagnetic brake system

Motorised joystick for optical head fine movements

Sensor: 2X 1/1.3" CMOS sensor

Resolution: HD 1080p

Video output: 2X 3G-SDI

3D output: side by side

Recording format: 3D & 2D, MP4 / MOV

Still image: 2D / 3D .jpeg, png

Internal Storage : 4TB

Monitor: 55" / 32"

Optional: SFL800 / SFL560
